

# Male Infertility

## Male Infertility is common, treatable, and rarely discussed

No matter where you are in your journey towards conception, it is important to take the step of getting a male assessment.

The process is easy: a Male Fertility Assessment includes a semen analysis and a consultation with a male fertility specialist. From there, we will make expert recommendations on your next steps.

### *Did You Know?*

Infertility occurs equally between both males and females. If you and your partner are trying to conceive, it's important to be aware of male infertility factors that elevate your risk and how they can affect your chances of successful conception.
